OS	Linux				
Languages	Javascript	SQL	Bash	HTML5	CSS
Environments	Node.js	Browser			
Libraries / Frameworks	React	Redux	Express.js	JQuery	Bootstrap 4
	Material-UI	Leaflet.js	D3.js		
Testing	Mocha.js	Chai.js	Sinon.js	Jest	
Task Runners	Webpack	Grunt			
Version Control	Git	Bitbucket			
Package managers	NPM	Bower			
DB Management	MySQL	PostgreSQL	Sequelize	Objection.js	
Infrastructure	DigitalOcean				

Work History

April 2018 - Present

Full Stack Developer

Autologyx Ltd. (SaaS Company)

United Kingdom

My role's primary focus was working with the developers and customer services team to partially or entirely transform the clientele's internal procedures to automated processes from discovery to successful launch.

- Led discovery sessions with clients to understand their internal procedures and converted them to process flows
- Designed and implemented relational database structures, backend services with REST API endpoints and coordinated with designers to build user interfaces
- Researched 3rd party services and integrated them with the Autologyx system
- Documented and coded unit and integration tests
- Investigated and documented bugs for other developers with proposed solutions

April 2016 - April 2018

Web Developer (Nov. 2016 – Apr. 2018)

Junior Web Developer (Apr. 2016 – Nov. 2016)

Arkenford Ltd. (Market Research Agency)

United Kingdom

My role included maintaining the company's internal administrative web applications and public websites. Provided support to the company's clientele in both green-and brownfield projects from tender through to completion.

- Maintained the company's internally developed tools and modules used by the data analyst team
- Built RESTful APIs for applications collecting and processing survey data
- Created new- and extended existing modules to automate tasks and scheduled processes
- Researched and integrated with external libraries for data visualization
- Designed relational database schemas, and worked on algorithms interacting with those databases to ensure quick response times

December 2015 – April 2016

Freelance Developer

Zeller & Zeller LLC. (B2B Administration)

Hungary

Managed to move the company's administration of 150 customers and business partners from excel tables to a content management system. Redesigned the company's website to be up to modern standards.

- Analysed the company's workflow to create a proper user- and task analysis for the application
- Developed both the Front-End and Back-End side of the administration application
- Tested the interface to identify weaknesses and presented solutions

August 2015 – December 2015

Freelance Developer

Baluswimbus LP. (Public transportation)

Hungary

Collaborated with the client to establish a brand identity and web presence from scratch. Implemented a lightweight news and contact application that helps communicating with their customers.

- Carried out multiple consultations with the customer to provide a satisfying solution
- Designed and developed the company's website
- Integrated external libraries to provide basic blogging functionality

Education

Budapest University of Technology and Economics (2002-2008) / Civil Engineering
